DEXTER

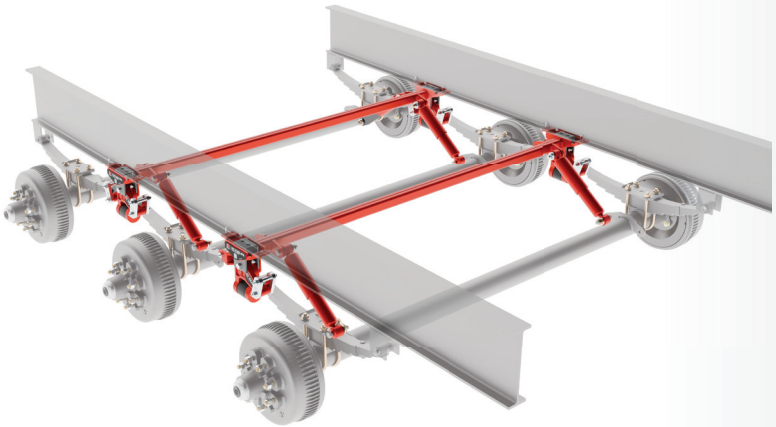
E-Z FLEX® STS

STABILITY & RIDE CONTROL

ENGINEERED TO CONTROL THE ROAD.

THE NEW STANDARD IN TRAILER STABILITY

E-Z Flex® STS Stability & Ride Control is engineered to reduce trailer rebound, sway, and frame stress for a safer, smoother towing experience with lasting comfort and durability.



- **Dramatically reduces rebound**, sway, and road vibration
- **Improves towing stability** for safer highway driving
- **Protects RV components**, interior finishes, and structural joints
- **Built with premium components** for proven durability

COMPATIBILITY:

Sprung Axle Models D35 through D80
33" or 35" Axle Spacing
Tandem or Triple Axle Configurations
