

HIGH PERFORMANCE MARINE PRODUCTS

MARINE TRAILER APPLICATIONS.

READY FOR THE WATER

- » Over 60 years of manufacturing experience
- » Corrosion resistant options for every application
- » Complete lineup of marine trailer axles, actuators, and components
- » Unparalleled technical knowledge for product specification
- » Industry leading warranty on all products
- » All axles and actuators are proudly assembled in the U.S.A.

MARINE AXLE OFFERING

Dexter is the leader in torsion and sprung axles. Dexter builds all axles to order, which allows trailer manufacturers the flexibility to specify axles for each application. Axle finishes are available in hot dipped galvanized, powder coat, painted, or raw. Trust Dexter for reliable axles and the ride you deserve.

» TORSION AXLES

VERSA~FLEX™ ADJUSTABLE TRAILING ARM TORSION AXLES

3,000 - 7,000 lbs.

Zinc coated components
for superior corrosion resistance

Removable trailing arm & spindle

Straight or center v-bend

Adjustable trailing arm

ELIMINATOR™ TORSION AXLE WITH REMOVABLE SPINDLE

1,000 - 7,000 lbs.

Zinc coated components
for superior corrosion resistance

Removable Spindles

Straight or center v-bend

8 start angles for varying ride heights

M-SERIES AXLES MARINE-GRADE TORFLEX® SUSPENSION SYSTEM

3,500 - 10,000 lbs.

Galvanized axle beam

Straight or center v-bend

Kodiak® by Dexter disc brakes

» SPRUNG AXLES

1,500 - 8,000 lbs.

Round, square, or rectangle tube

Straight or drop spindles

Center v-bend option available

Axles are available in hot dipped galvanized, powder
coat, painted, or raw

Disc or drum brake options available

Single, tandem, or triple axle applications

SMOOTH & POWERFUL BRAKES

» KODIAK® BY DEXTER DISC BRAKES

This braking system offers consistent performance with a shorter stopping distance. The self-adjusting calipers play a crucial role in maintaining brake alignment, resulting in improved braking efficiency. This not only ensures better performance but also contributes to smoother operation and an extended product life when compared to traditional drum brakes.

» LUBRICATION OPTIONS:

Trailer Buddy®
Standard Grease
XL Pro-Lube™

» CALIPER OPTIONS:

Stainless Steel
KodaGuard®
Gal-Dex®

» ROTOR OPTIONS:

Stainless Steel
Gal-Dex®

» DEXTER DISC BRAKES

Dexter is the market innovator in disc brakes, designed to perfectly fit our axles. This ensures your disc brakes not only fit but also meets Dexter's high-quality standards. Self-adjusting calipers eliminate the need for manual brake adjustment, which helps resist brake fade.

» LUBRICATION OPTIONS:

Vault®
Vortex®
Trailer Buddy®
E-Z Lube®
Standard Grease

» CALIPER OPTIONS:

Aluminum
Zinc

» ROTOR OPTIONS:

Zinc

» DRUM BRAKES

Available in 10" and 12"
Aluminum wheel cylinder

Corrosion resistant components
Free-backing or standard

BRAKE ACTUATION OPTIONS

» SURGE ACTUATORS

6,600 to 20,000 lbs. capacities

Corrosion-resistant rollers and bushings provide consistent sliding surfaces for smooth movement and superior load distribution

Linear stroke design provides uniform brake line pressure for improved stopping and reliable operation

Vigorously tested to ensure your trailer gets there safely

All Dexter surge actuators are proudly assembled in the U.S.A.

ISO 9001:2015 Certified Production Environment
