**Subject: Dexter DX Series Electro/Hydraulic Actuators**

In keeping with our continual commitment to product innovation, Dexter Axle is pleased to announce the redesign of our DX Series electro/hydraulic actuators beginning August 1, 2007. The product line has been updated with a new look and the inclusion of some additional features to enhance performance and operation. This will be a running production change and all part numbers will remain the same.

**Product Part Numbers:**

P/N: K71-650-00, Model DX1000 — 1,000 psi version for drum brakes

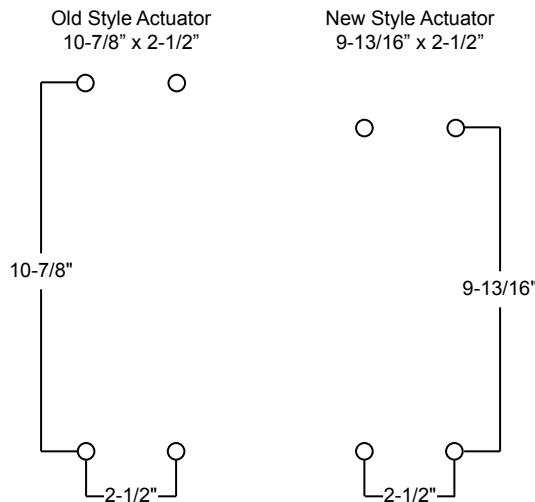

P/N: K71-651-00, Model DX1600 — 1,600 psi version for disc brakes

**Additional Features:**

- Additional wiring protection to prevent damage to the actuator if wired improperly
- Larger brake fluid reservoir size — increased from 40 to 50 cubic inches
- All stainless steel fasteners for improved corrosion resistance
- New, more compact, housing design
- Still includes Dexter's two year limited product warranty

**Important Note:**

The new actuator design has a different mounting pattern as shown below.

Please contact your Dexter Sales Engineer for additional questions or ordering information.
